Portfolio: portfolio-website-p5tr-gaurang-tyagis-projects.vercel.app

PROFESSIONAL SUMMARY

Frontend-focused Full Stack Developer with 3+ years of experience designing and shipping production-grade user interfaces with React.js, Next.js, and TypeScript. Specialized in component-driven architecture, reusable design systems, state management with Redux Toolkit and Context API, server-side rendering, and frontend performance engineering through code splitting, lazy loading, virtualization, and memoization. Backed by solid Node.js, Express.js, and microservices experience for end-to-end feature delivery. Proven record of improving page load speed by 15%, raising mobile UX scores by 25%, and cutting API response times by 60% through Redis caching. Strong collaborator in Agile/Scrum teams with experience in code reviews, accessibility standards, and mentoring junior developers.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, TypeScript, Redux, Redux Toolkit, Context API, React Hooks and Custom Hooks, React Router, React Query, React Hook Form, Server-Side Rendering (SSR), Static Site Generation (SSG), Incremental Static Regeneration (ISR), Component-Based Architecture, Reusable Component Libraries and Design Systems, Tailwind CSS, Material UI, SCSS, Framer Motion, Responsive and Mobile-First Design, Cross-Browser Compatibility, Web Accessibility (WCAG), Code Splitting, Lazy Loading, List Virtualization, Memoization, Error Boundaries, DOM Manipulation, AJAX

Programming Languages: JavaScript (ES6+), TypeScript, C++, SQL, HTML5, CSS3

Backend Development: Node.js, Express.js, RESTful API Design and Development, WebSocket API, Socket.io, Microservices Architecture, Server-Side Logic, Cron Jobs and Job Scheduling, Role-Based Access Control (RBAC), Authentication and Authorization, Third-Party API Integration, Error Handling, Stripe Payment Gateway Integration

Databases: MongoDB, PostgreSQL, MySQL, Elasticsearch, Redis, Database Design and Data Modeling, Query Optimization, Database Indexing, Stored Procedures, Complex Joins, Aggregation Pipelines, Schema Design

DevOps and Tooling: Git, GitHub, GitHub Actions, CI/CD (Continuous Integration and Continuous Deployment), Docker, Docker Compose, Multi-Stage Builds, Containerization, Webpack, Babel, ESLint, Prettier, Postman, Chrome DevTools, Lighthouse, npm, Vercel, VS Code, JIRA

Engineering Practices: Agile, Scrum, Sprint Planning, Code Review, Unit Testing, Debugging and Troubleshooting, Frontend Performance Optimization, Caching Strategies, State Management, API Documentation, Version Control, Build Pipelines, Code Quality Standards, Software Development Life Cycle (SDLC), Object-Oriented Programming (OOP), Data Structures and Algorithms

Soft Skills: Problem Solving, Cross-Functional Collaboration, Technical Communication, Mentoring, Ownership, Time Management

PROFESSIONAL EXPERIENCE

Software Engineer — Sarv.com

Jaipur, Rajasthan, India | May 2025 – Present

- Built and shipped React.js and Next.js frontends for full stack web applications serving thousands of daily active users, owning UI architecture, routing, and state management end to end.
- Engineered scalable RESTful APIs with Node.js and Express.js handling high-volume daily traffic, sustaining optimized response times under 200 ms.
- Implemented advanced caching strategies and database indexing across PostgreSQL and MongoDB, reducing query execution time by 40%.
- Designed and integrated WebSocket APIs and their React real-time UI layer for live communication features, increasing user engagement by 30%.
- Built GitHub Actions CI/CD pipelines (ESLint, automated tests, Webpack build, deploy), cutting release cycles by 35%.
- Containerized services with Docker using multi-stage builds and Docker Compose, ensuring environment parity across development and production.
- Collaborated with cross-functional teams across Agile sprints to deliver features on schedule, maintaining 95% sprint velocity.

Software Developer — Grape Technology

Dubai, United Arab Emirates | May 2023 – May 2025

- Developed and maintained responsive, mobile-first user interfaces with React.js, improving mobile user experience scores by 25%.
- Built 20+ reusable React components in TypeScript, reducing code redundancy by 20% and accelerating development cycles.

- Implemented Redux and Context API for state management across complex applications, reducing state-related defects by 25%.
- Configured Webpack 5 (code splitting, lazy loading, tree shaking) with Babel transpilation and React memoization, achieving 15% faster page load times.
- Enforced code quality with custom ESLint rule sets integrated into GitHub Actions checks on every pull request.
- Integrated role-based authentication and protected routing for 3+ user roles, strengthening application security and access control.
- Partnered with backend developers to design and consume RESTful APIs, ensuring reliable data flow and robust error handling.

PROJECTS

Octopus Social — Social Commerce, Events and Service Booking Platform

React.js, Next.js, TypeScript, Redux Toolkit, React Query, Tailwind CSS, Socket.io, Node.js, MongoDB, Stripe API

- Led frontend architecture and development of Octopus Social, a unified platform that integrates a social media network with e-commerce, online and physical event management, and service booking, delivered as a modular React.js and Next.js application.
- Designed a shared component library of 60+ reusable TypeScript React components and a token-based design system, cutting new-feature UI development time by 35% and removing duplicate styling across five product modules.
- Built an infinite-scroll social feed with list virtualization, optimistic UI updates, and React Query caching, keeping interactions smooth at 10,000+ posts and reducing unnecessary re-renders by 45%.
- Developed shoppable-post and storefront journeys covering product listing, faceted filters, cart, and Stripe checkout, using Redux Toolkit for global state with loading and failure states handled through React Error Boundaries and Suspense.
- Implemented the event management module for both online and physical events, including calendar views, ticket booking, seat and slot selection, attendee dashboards, and QR-based check-in screens.
- Created a multi-step service booking flow with an availability calendar, dynamic slot picker, and real-time Socket.io notifications for booking confirmation and status updates.
- Optimized delivery with Next.js SSR and ISR, route-level code splitting, lazy loading, and memoization, achieving a Lighthouse performance score above 95 and Largest Contentful Paint under 2 seconds on fully responsive, WCAG-compliant screens.

E-Commerce Platform with Real-Time Features

React.js, Node.js, Express.js, MongoDB, Socket.io, Elasticsearch, Stripe API

- Built a full-featured e-commerce platform with a React.js storefront and real-time inventory updates over WebSocket, supporting high concurrent user loads.
- Integrated the Stripe payment gateway with a secure checkout flow and comprehensive error handling for reliable transactions.
- Implemented advanced filtering, sorting, and search UI backed by Elasticsearch, improving search accuracy by 40%.

EDUCATION

Master of Computer Applications (MCA), Computer Science

Lovely Professional University | September 2022 – September 2024 | 88%

Bachelor of Computer Applications (BCA), Computer Science

University of Rajasthan | August 2019 – August 2022 | 80%

CERTIFICATIONS

- JavaScript Algorithms and Data Structures — freeCodeCamp
- Responsive Web Design — freeCodeCamp
- C++ Certification — Cipher School
- TCS ESG Virtual Experience Program — Tata Consultancy Services

ACHIEVEMENTS

- Received the Employee of the Quarter award at Grape Technology for outstanding engineering performance and code quality.
- Mentored 3 junior developers on React and Node.js best practices, improving team productivity and code quality standards.
